

### **Summary of LOPROX<sup>®</sup> Shampoo Safety Information**

LOPROX<sup>®</sup> Shampoo is approved for the topical treatment of seborrheic dermatitis of the scalp in adults. If the scalp condition does not improve after 4 weeks of treatment, please see your doctor, as the diagnosis of seborrheic dermatitis should be reviewed. LOPROX Shampoo should not be used by people who have allergies or are hypersensitive to any of its ingredients. The most common side effects are itching, burning, redness, seborrhea, and rash. If you experience a reaction or sensitivity to LOPROX Shampoo, stop use of the product and contact your doctor for the appropriate treatment response. Avoid getting the product in your eyes—if contact does occur, rinse thoroughly with water. While seborrheic dermatitis may appear at puberty, the safety and effectiveness of LOPROX Shampoo has not been established in patients younger than 16 years. The safe and effective use of LOPROX Shampoo in patients who have a history of immune system deficiencies or who have nerve disorders caused by diabetes has not been established.
